

ARE YOU A VETERAN?

PARTICIPATE IN A PAID STUDY!

We use brainwaves to study how people comprehend speech. **Our goal is to understand and improve the hearing ability of service members.**

You can help out by participating in this paid research study!

This study typically has 2 sessions, both at the UC Davis Center for Mind & Brain:

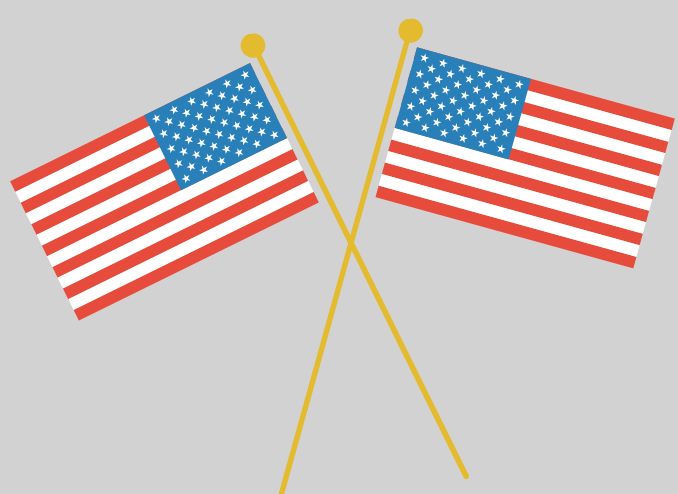

- **Session 1: A standard hearing exam and cognitive testing session**
- **Session 2: An EEG recording session**

You will be compensated for your time and travel.

PARTICIPANT CRITERIA: Please look carefully to see if you satisfy **ALL** the criteria below:

1. Veteran: off-duty/on-leave/retired (no active duty can participate)
2. Age 20-70
3. Adequate vision in at least one eye (contacts or glasses ok)
4. Hearing loss or good hearing is ok! (However you may NOT currently be wearing hearing aids)
5. NO history of neurological injury or psychiatric condition that prevents you from attending to speech.
a. Note: Conditions such as anxiety, depression, PTSD, or TBI that do not directly affect attending to speech are ok.
6. NO scalp problems or hair conditions that prevent brainwave recording OR ear conditions that prevent using earphones.
